DETAILED ACTION

- 1. This communication is in response to Remarks received 04/13/2005.
- 2. Claims 1-8, 12-14, 19-22 are pending, claims 1, 12, 19-22 are independent.

 Claims 9-11 and 15-18 have been canceled. Claims 1-8, 12-14 have been amended.
- 3. The objections to claims 1-18 have been withdrawn in accordance with the applicants' amendments.

Election/Restrictions

Restriction to one of the following inventions is required under 35 U.S.C. 121:

- Claims 12-15, and 21-22, drawn to generating a dictionary, classified in class 704, subclass 10.
- Claims 1-8, 19-20, drawn to finding word analogousness, classified in class 704, subclass 9.

The inventions are distinct, each from the other because of the following reasons:

Inventions I and II are related as combination and subcombination. Inventions in this relationship are distinct if it can be shown that (1) the combination as claimed does not require the particulars of the subcombination as claimed for patentability, and (2) that the subcombination has utility by itself or in other combinations (MPEP §

Application/Control Number: 09/830,532

Art Unit: 2654

806.05(c)). In the instant case, the combination as claimed does not require the particulars of the subcombination as claimed because the combination is directed at creating a dictionary of registered words, not having to find the analogousness between and input word and a registered word. The subcombination has separate utility such as it is able to find analogousness between input words and registered words by creating word trains based on notation functions and finding the analogousness between each created word train and a registered word train.

Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.

A telephone call was made to William Frommer on June 24th, 2005 to request an oral election to the above restriction requirement, but did not result in an election being made.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Thomas E. Shortledge whose telephone number is (571)272-7612. The examiner can normally be reached on M-F 8:00 - 4:30.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Richemond Dorvil can be reached on (571)272-7602. The fax phone number for the organization where this application or proceeding is assigned is 703-872-9306.

Information regarding the status of an application may be obtained from the Patent Application Information Retrieval (PAIR) system. Status information for published applications may be obtained from either Private PAIR or Public PAIR. Status information for unpublished applications is available through Private PAIR only. For more information about the PAIR system, see http://pair-direct.uspto.gov. Should you have questions on access to the Private PAIR system, contact the Electronic Business Center (EBC) at 866-217-9197 (toll-free).
